<b>Acute toxicity</b>	<b>Information available for the product:</b> This product is expected to be of low toxicity. Ingestion is considered unlikely due to product form.
<b>Skin</b>	Mechanical irritant. Prolonged or repeated contact may result in mild irritation due to mechanical action.
<b>Eye</b>	Mechanical irritant. Due to product form and nature of use, the potential for exposure is reduced. Product may only present a hazard if material is cut, drilled or sanded with dust generation, which may result in mechanical irritation.
<b>Sensitisation</b>	Not classified as causing skin or respiratory sensitisation.
<b>Mutagenicity</b>	Not classified as a mutagen.
<b>Carcinogenicity</b>	Adverse health effects, usually associated with long term exposure to high crystalline silica dust levels are not anticipated due to product form. This product may only present a hazard if rocks are cut or drilled with dust generation. Crystalline quartz is classified as carcinogenic to humans (IARC Group 1).
<b>Reproductive</b>	Not classified as a reproductive toxin.
<b>STOT – single exposure</b>	Dust can be generated during cutting of the product. Dusts are mechanical irritants that may cause throat irritation.
<b>STOT – repeated exposure</b>	Adverse health effects, usually associated with long term exposure to high crystalline silica dust levels are not anticipated due to the product form. This product may only present a hazard if rocks are cut or drilled with dust generation. Chronic exposure to dust may cause lung fibrosis (silicosis).
