

SITE SPECIFIC Risk Assessment

Date:	New	✓	Revised	Page	

TRADE: CARPENTER

Job No:	7598/14	Client:	WELLS
Address:	12 Goondari Road, Allambie Heights NSW	Supervisor:	MATT SAUNDERS

Key:	"1" action now	"2" action ASAP	"3" action ASAP
itoy.	1 400001111011	= 4011011710711	0 4011011710711

- **Note 1:** Refer to the general Safety Plan and Safe Work Method Statement.
- **Note 2:** Safe work procedures shall be implemented for the supply and use of a *hazardous chemical / substance/s* on site that complies with the material data sheet recommendations and also complies with the requirements of WHS Regulation 2011 Chapter 3 Part 3.2
- **Note 3:** all *manual tasks* to comply with the requirements of Safe Work Australia National Code of Practice for Manual Handling 2009 or WorkCover NSW Code of Practice Hazardous manual tasks

Note 4: Review of Control Measures - If there are any tasks that may be included by way of variation to the plans or an alternative approach to the set task, it is a requirement to carry out a "Specific Risk Assessment" for the tasks.

Job Step / Hazard	Potential Harm	Likely	Possible	Unlikely	Major	Severe	Minor	Priority	Possible Controls	Responsible Person/s	Date
Access to site / work areas - Slips, trips, falls and accessibility - Access ways not clearly defined	Slips, trips and falls		✓			✓		3	Assess travel path and distance to work area Ensure unobstructed access to site and work areas.	Site Supervisor /all 'workers'	
Stored materials - Slips, trips, falls and accessibility - Access ways not clearly defined	Slips, trips and falls		✓			✓		2	Assess travel path and distance to work area Ensure unobstructed access to work areas. Provide and maintain barricades to isolate material and to restrict access. Provide designated waste areas.	Site Supervisor / all 'workers'	
Manual tasks	Muscle strain - back injuries and cuts Over exertion or repetitive movements		✓			✓		2	Assess travel path and distance to work area Use mechanical assistance where practicable; provide training in the use of the equipment Identify the risks and plan the task in consultation with the	Contractor / all 'workers'	

		Lil	keliho	od		Resu	lt				
Job Step / Hazard	Potential Harm	Likely	Possible	Unlikely	Major	Severe	Minor	Priority	Possible Controls	Responsible Person/s	Date
									'workers' Ensure one [1] person is appointed to plan and take charge of the task Plan the task in stages - e.g. ensure grip is secure; lift to waist height; place support under load; team 'workers' to re-group then lift load into position Use trained 'workers' and team lifting - rotate 'workers' and vary tasks. Ensure enough space is available for the team 'workers' to safely manoeuvre as a group. Where possible, use team 'workers' of a similar height and capability Provide additional team 'workers' to assist that are proportional to the weight and difficulty of the task Ensure load is shared evenly Ensure team 'workers' know their responsibility during the lift On sloping sites, ensure safe		
Exposure to noise Plant / equipment	Hearing damage		√			✓		2	footing is provided Isolate plant and equipment Use appropriate PPE	All 'workers'	
Exposure to dust / fibres / chemical vapours - Hazardous chemicals - Biological -	Dust / fibres inhalation - respiratory problems Skin and eye allergies/ irritations.		✓			✓		2	Apply appropriate procedures necessary to contain dust / fibres / chemical vapours. Use appropriate PPE - disposable dust / fibres / chemical vapour protection.	Contractor / all 'workers'	
Exposure to UV light / weather - UV light - glare Extreme temperatures	Skin cancer / sun burn - Dehydration - heat stroke or fatigue Sight damage		✓			√		2	Reduce exposure where possible. Monitor 'workers' condition Adequate fluid intake Use appropriate sun screen. Wear appropriate PPE.	Contractor / all 'workers'	

		Lil	keliho	od		Resul	lt				
Job Step / Hazard	Potential Harm	Likely	Possible	Unlikely	Major	Severe	Minor	Priority	Possible Controls	Responsible Person/s	Date
Contact with o/head electrical services / point of attachment - Power lines not isolated, covered or enclosed - Working to close to electrical supply - Strong winds causing power lines to swing close to work area - Wet conditions making 'tiger tails' ineffective	Electric shock or electrocution		✓			√		3	Identify that the electrical supply is isolated prior to work commencing. Provide 'tiger tails' [insulation] - adequately boxed adjacent to scaffold extended an appropriate distance past the boundary	Licensed Electrical Contractor or Approved person Site Supervisor Contractor / all 'workers'	
Protection of other 'workers' and the public - Slips, trips, falls and accessibility - Access ways not clearly defined - Hazardous chemicals - Biological	Slips, trips and falls Wind- borne dust / fibres Struck by falling objects		✓			✓		2	Provide barricades to materials stored on footpath Provide and maintain barricades to isolate and to restrict access to work areas. Use of shade cloth around work area. Wet down dust. Provide "Spotter" to stop others entering work area	Site Supervisor Contractor / all 'workers'	
Location of services - Electricity - insulation to old wiring frayed or brittle [conduit] or easily damaged - water pipe electrified Gas - Hazardous chemical Biological	Electric shock or electrocution Gas service - explosion Inhalation and exposure to hazardous chemicals.		√		✓			3	Isolate / relocate electrical supply / wiring. RCD installed on mains supply / portable generator Isolate / relocate gas supply	Site Supervisor / all 'workers'	
Working at height - [over 3m] Slips, trips, falls and accessibility - Inadequate fall prevention system / work platform -	Fall from roof edge/ work platform/ through roof or roof framing Fractures, bruises lacerations and personal injuries		√		✓			1	Assess travel path to work area Ensure unobstructed access to work areas. Provide guardrails, perimeter edge protection / catch scaffold. Scaffold / work platform to	Site Supervisor Contractor / all 'workers'	

		Lil	keliho	od		Resul	t				
Job Step / Hazard	Potential Harm	Likely	Possible	Unlikely	Major	Severe	Minor	Priority	Possible Controls	Responsible Person/s	Date
Roofing material - brittle Increased traffic on roof surface - walking in the middle of battens - Gravity - overbalancing Windy and or wet conditions Stripping existing roof covering and frame - Slips, trips, falls and accessibility - Inadequate fall prevention system / work platform - Roofing material - brittle Increased traffic on roof surface - walking in the middle of battens - Windy and or wet conditions - Gravity - overbalancing - Hazardous chemicals - Biological - Manual tasks -	Slips, trips and falls from work platform. Fractures, bruises lacerations and personal injuries / cuts and abrasions. Struck by falling object. Exposure to ceiling dust and insulation fibres - respiratory problems. Electric shock or electrocution		✓			✓		2	Outer perimeter. Use trained / experienced 'workers'. SWMS Conduct hazardous chemical assessment prior to work commencement of works. Adequate consultation with relevant "workers" Appropriate removal procedures to contain dust / fibres. Provide debris chute. Controlled lowering of roofing tiles Provide barricade to restrict access to the work area. Provide "Spotter" to stop others entering work area Don't stack materials on roof or on scaffold. Use trained 'workersensure 'workers' know their responsibility during the work process Don't remove metal roof	Contractor / all 'workers'	
Electricity									sheeting on windy days. Use of appropriate PPE		
Carry and install tarpaulins to exposed roof space - Slips, trips, falls and accessibility - Inadequate fall	Slips, trips and falls Back injuries - strains and sprains Struck by flying object		✓		✓			1	Assess travel path and distance to work area Ensure unobstructed access work area. Use trained 'workers' and team lifting to position tarp. Additional 'workers' to assist where required	Contractor / all 'workers'	

		Lil	keliho	od		Resul	t				
Job Step / Hazard	Potential Harm	Likely	Possible	Unlikely	Major	Severe	Minor	Priority	Possible Controls	Responsible Person/s	Date
prevention system / work platform - Windy and or wet conditions - Gravity - overbalancing - Manual tasks									Ensure team 'workers' know their responsibility during the positioning of the tarp Ensure all tarps are securely tied down and not weighted with tiles.		
Carry materials and tools to ground floor work areas - Slips, trips, falls and accessibility - Access ways not clearly defined Manual tasks	Slips, trips and falls Muscle strain - back injuries and cuts Over exertion or repetitive movements		√			✓		2	Assess travel path and distance to work area Ensure unobstructed access to site and work areas. Use trained 'workersensure 'workers' know their responsibility during the work process Rotate 'workers' and vary tasks.	Contractor / all 'workers'	
Removal of fibre cement [FC] internal wall linings - Slips, trips, falls and accessibility - Hazardous chemicals - Biological - Manual tasks - Proximity to other 'workers' and public	Inhalation and exposure to FC fibres / dust - respiratory problems Slips, trips and falls through frame Fractures, bruises lacerations and personal injuries Exposure to ceiling dust - eye and skin irritations - respiratory problems.		~			✓		3	Assess travel path and distance to work area Ensure unobstructed access to work areas. Conduct hazardous chemical assessment prior to work commencement of works. Adequate consultation with relevant "workers" Appropriate removal procedures to contain dust / fibres. Use trained experienced 'workers'. Appropriate warning signage and barricades to restrict access into the work area. Remove sheets with minimal breakage Wet down to minimise dust / fibre release. Seal residues of FC that cannot be removed from timber framed members Wrap all material in heavy duty plastic sheeting and seal.	Site Supervisor Contractor / all 'workers'	

Demolish internal framed walls at ground level - Slips, trips falls and accessibility - Access ways not clearly defined - Electricity - Exposure to dust - Manual tasks - Hazardous chemicals - Biological - Gravity - stability of the structure - Proximity to other workers' Carrying materials, floor timbers fjoists up ramp / scaffold - Slips, trips, falls and accessibility - Access ways not clearly defined - Lectric shook or electroculion clearly defined - Use trained workers and vary tasks Courteration and exposure to dust - Silogicial - Proximity to other workers' Carrying materials, floor timbers fjoists up ramp / scaffold - Slips, trips, falls and accessibility - Slope of ramp Windy and or wet conditions - Manual tasks Demolish internal framed walls at genuine dust fibre synthesis up a fall work area. Regularly monitor airborne distance to work area. Wet down to minimise dust release. Guardralis and toe boards to soll are in place - ramp surface clean and dry. Use trained workers' and team lifting - ensure team workers' know their responsibility during the work process			Lil	keliho	od		Resul	t	_			
Demolish internal framed walls at ground level - SWMS Slips, trips, falls and accessibility - Access ways not clearly defined - Electricity - Betain and such injuries and outs Exposure to dust - Muscle strain - back injuries and outs Acress ways not clearly defined - Electricity - Betain in Back injuries and outs Exposure to dust - Were regetive movements. Chemicals - Silips, trips and all electricity and every movements. Chemicals - Silips and electricity - Silips trips and electricity of the structure - Injuries due to collapse Carrying materials, floor timbers / joists up ramp / scaffold - Slips, trips, falls and accessibility - Slope of ramp Windy and or wet conditions - Windy and or wet conditions - Windy and or wet conditions - Manual tasks Manual tasks Manual tasks Manual tasks Demois in the wall and distance to work area and distance to work area and distance to work area. Injuries and to the structure - Injuries dust trelease. Carrying materials, floor timbers / joists up ramp / scaffold - Slips, trips, falls and accessibility - Slope of ramp Windy and or wet conditions - Manual tasks Manual tasks Manual tasks	Job Step / Hazard	Potential Harm	Likely	Possible	Unlikely	Major	Severe	Minor	Priority	Possible Controls		Date
