Safeworksite Features

Five subscription levels
0) Subcontractor (added by parent company) to manage own users, documents and comply with Parents WHS
1) Manage own users, clients, sites, documents, WHS (no ability to add child companies)
2) Manage subcontractors and add child companies (in addition to above)
3) Manage planners and quality assurance (in addition to above)
4) Cape Cod. This is a special level because I believe CC has initially created the WHS website around their own needs and they may require some individual features/customisation. (in addition to above)
